MobileComm Professionals Inc.

Cost-effective solutions for the wireless industry

MobileComm is a key industry player in the wireless services arena. We utilize our expertise in wireless services to provide quality centric cost effective solutions all major wireless mobile Operators, Engineering firms, infrastructure providers and Original Equipment Manufacturers (OEM's).

MobileComm enjoys the distinct advantage of being an independent wireless network professional technical services vendor with a robust and integrated portfolio of wireless solutions. Our service offerings portfolio spans all aspects of RF design, Implementation, performance engineering and optimization of second, third generation and emerging technology networks. Our engineering and business consultants are highly tenured and are seasoned professionals who employ a uniquely balanced approach to achieving coverage, capacity, cost and quality objectives for customers.

MobileComm is a growing provider of value added products to the telecom sector. Our VAS portfolio includes Content Based Services, such as Messaging and Call Management, Mobile Commerce Support Systems and infotainment. These products make the most use of handsets, providing value to subscriber and increasing revenues.

MobileComm also utilizes its Information Technology and software development experience to develop applications that bring efficiency to engineering activities.

## What we do

Our ultimate goal is to enhance every subscriber's call experience. And to this end, whether we are implementing a comprehensive, analytical, network optimization solution for a mobile operator or installing new mobile applications on handsets and other user interface devices, MobileComm is committed to providing quality services at every step of the way.

Our personnel proactively communicate with our clients for select assignments that range from high-level business development plans to strategically detailed and tactically focused projects.

The professionals at MobileComm possess academic credentials that range from advanced engineering degrees to MBAs, yet it is our broad and deep telecommunication aptitude and our sharp business acumen that have translated these engagements into successes with our clients. Some of the strategic engagements that we are capable of include:

- Business Development and Evaluations
- Bid Preparation and Vendor Selection
- Risk Management and Mitigation

MobileComm Professionals wins #1 position at the 2006 Tech Titan awards for 1 year revenue growth. MobileComm Professionals was ranked amongst the Top 50 fastest growing technology companies. We were listed in the 2006 Tech Titan Fast 50 group of technology companies announced by the Metroplex Technology Business Council (MTBC).

MobileComm categorizes its performance into multiple areas of customer satisfaction. MobileComm scores a 97% overall satisfaction rating, based on surveys conducted by the PM office and Executive Follow-up Programs.

MobileComm is an ISO 9001-2000 certified organization committed to complete customer satisfaction

## Our Offerings

Innovation and an astute understanding of the wireless industry have led us to bring high quality, cost effective service solutions to our customers. At the inception of MobileComm, our aim was to tap the potential of different segments in the wireless industry, while concurrently providing high quality, cost effective service solutions. Our engineers have been involved in design, implementation and testing of latest 3G UMTS and WiMAX networks. Our drive test teams have logged over 6 million miles in engagements throughout the US, a sure sign of the way we are headed.

MobileComm can scale to meet the different needs of our customers with our qualified personnel and equipment, which helps us meet your critical dates/milestones. Some of our key offerings include:

- Operations and Maintenance
- Geo Data for Planning Tools
- Value Added Services for Mobile Applications
- Software Application Development

- Conventional Network Planning and Design
- Performance Engineering and Network Optimization
- Drive Testing and Data Analysis
- Network Benchmarking for Voice and Data networks
- Installation and Commissioning

MobileComm's vast repertoire of experience includes idEN, CDMA, EVDO, EVDV, TDMA, GSM, GPRS, EDGE, UMTS, WiMAX as well as future 4G technologies. Our ultimate goal is to enhance every subscriber's call experience. And to this end, whether we are implementing a comprehensive, analytical, network optimization solution for a mobile operator or installing new mobile applications on handsets and other user interface devices, MobileComm is committed to providing quality services at every step of the way.

At MobileComm, our telecommunications and IT experiences are channeled to provide comprehensive software solutions for mobile operators and subscribers. The software solutions created by MobileComm extend beyond the quotidian services of designing, testing and optimizing wireless networks, which we nevertheless perform with excellence.

MobileComm professionals possess academic credentials that range from advanced engineering degrees to MBAs, yet it is our broad and deep telecommunication aptitude and our sharp business acumen that have translated these engagements into successes with our clients.

## Behind our Success

Our success stems from strategic decisions of reinvesting back into MobileComm's business infrastructure. While MobileComm continues to grow by replicating its success as a dependable provider of wireless professional services and by expanding our solutions portfolio - we will continue to provide the same personalized service and attention to detail that makes us successful.

At MobileComm, we aspire to provide cost-effective solutions to the wireless industry, without compromising on quality. Rapid deployment of services ensures that we can meet your deadlines and schedules with proven results and top quality deliverables. Our commitment to expand and provide additional value added services ensures we provide our customers with impeccable quality and steady growth.

The most important factors in our plan for continued growth are:

- Personnel Development
- Re-Investment
- Research and Development
- Adding synergetic products and services
- Maintaining Quality and cost

## About Us

A firm foundation leads to a strong edifice and with MobileComm Professionals that is our story. When MobileComm Professionals was conceived as a wireless services company, our collective experiences in varied fields such as 2G and 3G air interface technologies helped us to provide value-added solutions to our clients. Our solid background in wireless technologies naturally aided us in anticipating the needs of our clients and thus began a journey that has simply grown immeasurably. Our foremost aim is to create and deliver solutions, which add immense value and help reduce costs for mobile operators.

For success to continually add up and lead to the present day scenario at MobileComm, we focused intensively on reinvesting in ourselves. In the industry, although we started out as a RF engineering company, we have added synergic verticals in our portfolio and slowly, yet surely transformed ourselves into a nationally recognized solutions provider. Today, we stand where we are because of our operating philosophy that concentrates on five fundamentals:

### **People**

We recruit, train and ensure that only the best personnel are part of our work force

### **Equipment**

Reinvestment in the company includes building and upgrading the latest RF test and measurement equipment

### **Satisfaction & Service**

We aim to provide complete satisfaction to our customers by providing them world-class service

### **Quality**

Maintaining high quality is at the top of our agenda, and we make sure that the quality of our services or products is never compromised

### **Relationships**

We develop productive relationships in the wireless industry, relationships that are fruitful and mutually beneficial

### **Portfolio Enhancement**

On regular basis we learn and add new products and services which complement our existing services spectrum.
