

AT MOBILECOMM KNOWLEDGE IS OUR ASSET AND APPLYING THIS KNOWLEDGE TO PROVIDE COST EFFECTIVE SOLUTION IS OUR BUSINESS.

Training

The training and consulting solutions delivered by us have proven successful for telecommunication equipment manufacturers, service providers, and management consulting firms. By combining extensive telecommunication expertise and industry experience with innovative training techniques, we provide value added solutions to our customers.

MobileComm Training Solution:

MobileComm Professionals, Inc. the global wireless engineering services Corporation, is involved in the field of Wireless engineering services. Our vast experience in RF engineering has helped us in developing methodologies and procedures to successfully deliver wireless projects and curricula for providing cutting edge technical training.

The company provides a comprehensive wireless educational program to individuals and enterprises by offering training that is customized to the varied needs of audiences. MobileComm has been innovating, refining, and fine tuning its programs to suit the needs of wireless Industry. Our suite of educational programs encompass every kind of learner— from a fresh graduate seeking a career in wireless Industry, to a professional gaining cutting-edge technological skills.

100% of our trained candidates have successfully secured a career in the telecom industry. Our current training portfolio consists of more than 20 courses in different technologies. The advanced technology training courses that MobileComm offers are well suited to acknowledge present industry needs.

MobileComm Advantage:

The Wireless Educational packages from MobileComm are low cost high value. Our Training Courses are ideally suited for cellular operators and enterprises that want to induct fresh graduates. Our courses introduce planning software, data collection tools, RF engineering processes, and methodologies for them to be productive from the day of hire.

MobileComm Resources:

Our trainers, not only understand the technology but they also know how to teach! Our Trainers, have relevant experience in network Design and optimization, Field engineering and standard methodologies and procedures. Our technical areas of expertise include 1x/1xEV-DO, GSM/GPRS, UMTS and WiMAX technologies. They bring invaluable knowledge to the classroom which is gained from their real-world experiences.

Our focus is to bring awareness of RF technology to the masses, training them to the specific needs of the telecom industry and reducing the pain of hiring qualified resource.

“

Fundamentals of RF
RF Drive testing
RF Design & Planning
Planning Tools
Post processing Tools
Network Optimization
Parameter Tuning
GSM basics to Advance
CDMA basics to advance
1xRTT, 1xEVDO, 1xEVDV
UMTS
WiMax. ”

THE MISSION OF MOBILECOMM'S CERTIFICATE TRAINING PROGRAM IS TO HELP OUR CUSTOMERS SUCCEED IN RAPIDLY CHANGING TECHNICAL ENVIRONMENT AND GIVE THEM AN EDGE OVER COMPETITORS.
